

112 day maturity

M637

brand

(Conventional)

Soil Types Medium to Heavy
Planting Population 28,000 to 36,000

- Excellent test weight
- Above average grain quality
- Place on better soils, manage against droughty situations
- Best positioned in a corn-bean rotation

Agronomic Characteristics

GDU's to Mid-Pollination	1380
GDU's to Black Layer	2825
Emergence	3
Vigor	3
Root Strength	4
Stalk Strength	4
Drought Tolerance	4
Greensnap	4
Plant Height	Medium-Tall
Ear Placement	Medium-High
Ear Girth (Avg. Rows)	16-18
Ear Type	Flex
Health (Stay Green)	5
Cob Color	Red
Harvest Appearance	3
Drydown	5
Test Weight	2

Disease Management

NCLB Race 1	4
NCLB Race 2	3
SCLB	4
Gray Leaf Spot	5
Eye Spot	3
Common Rust	3
Southern Rust	5
Anthracnose Leaf Blight	4
Anthracnose Stalk Rot	6
Stewart's Leaf Blight	3
Goss's Wilt	3

Herbicide Management

Growth Regulator Sensitivity	A
Sulfonylurea Sensitivity	A
Pigment Inhibitor Sensitivity	A

Focused on Your Future

Before opening a bag of seed, be sure to read and understand the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

KEY

GDU's measured from planting date
 1-2 = Excellent 3-4 = Very Good
 5-6 = Good 7-8 = Fair 9 = Poor

For Disease Ratings

Relationship to % of green tissue remaining when disease is present.

NA = Not available

Herbicide Sensitivity

A = Acceptable when applied to label directions

C = Caution should be used for rates and growth stage

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. **IMPORTANT: Grain Marketing and Seed Availability:** Genuity™ VT Triple PRO™ has received the necessary approvals in the United States, however, as of 8/5/09, approvals have not been received in all major corn export markets. Genuity™ VT Triple PRO™ seed will only be available as part of a commercial demonstration program that includes grain marketing stewardship requirements. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Consult with your seed representative for current stewardship information.
