TEST COMMENTS: Ronnie said that this site received 19" of rain in the June, alone. Despite the rain, plant emergence was uniform. A thunderstorm after pollination caused green snapping in a few hybrids. Lodging scores mainly reflect green snap but stalk lodging was noted. The yield difference between tests is due to soil change and the full test had a slight elevation advantage. Lat: N38.96296, Long: W-89.1452
