TEST COMMENTS: *Jud said that his soybeans cut very tough through his combine, making for a slow harvest. Spring planting conditions were very favorable for this no-till site, providing excellent emergence scores. Most varieties had very good standability. Plants had medium growth, ranging from 40-48" in height. Seed size was large and mostly good quality. There were a few discolored and/or poorer quality seeds.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
