**Test Comments:** This site had excellent seedling emergence. John's use of a fungicide helped this plot stay healthy and green. Plant height ranged from 8-10' tall. Kernel depth was 1/5" and of excellent quality. John talked about how variable the summer rains were on his fields. One field would receive an inch of rain while another field a half mile away only got a tenth or two.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
