**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

**Test Comments:** *Planting conditions were ideal and the plot received a couple of showers after planting, but then turned off dry. When we were taking stand counts at the V5-V6 growth stage, corn leaves were rolling due the heat. Later, the season turned around and everything fell into place. Stalks were still good and ears were filled close to the tip, but not as much girth as we have seen at other sites.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
