Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

Test Comments: *This is a new FIRST location this year and it provided very nice uniform tests. Emergence was excellent and plot looked nice and uniform at V5-V6 stage. Rainfall was limited in July and August. Lodging scores reflect root lodging caused by a wind storm. Plants were goose-necked but easy to harvest. Stalks and plants were still healthy with most hybrids having some green plant material at harvest.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
