**Test Comments:** *This was a very nice uniform location. Stands were excellent, with good growth all season long. Curt stated, "the field averaged close to 240 bu/A around the plot and that small amounts of gray leaf spot was seen". Plants were all standing excellent, ears were nice sized, filled close to the tip, and easy to harvest. On most hybrids the ears were hanging down already, but still had strong ear shanks.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
