**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

**Test Comments:** *This was a really nice plot. It started off really well with great stand. Rainfall was limited during July and August. A wind storm shortly after pollination that impacted one corner of the test area, but all the corn was harvestable. There were small pockets of gray leaf spot and northern corn leaf blight but nothing significant. Most ears were filled within 1/2 inch of the tip with good kernel depth.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
