Test Comments: Again, another nice plot at this location. Planting conditions were good, but emergence was not as uniform as I would have liked to have seen. Plant heights were nice and even at V5 but not everything made it out of the ground. Growing conditions all season were better than average and plants responded well. Nice ear fill and kernel depth. Leaves had some tar spot present, but not severe.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
