Good rainfall the rest of the year helped produce the yields displayed. There was little disease noted and stalk quality was still pretty good.

Any lodging recorded were from plants snapped off around the second node. Ears were filled close to the tip with kernels of good depth.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
