TEST COMMENTS:

This location was planted in the last part of April into outstanding soil conditions. The plot had nice and even emergence and looked good all season long. Plentiful rain and heat throughout the season helped this location mature well. Tar Spot and Gray Leaf Spot were present in the plot. Stalk lodging was also present due to some high winds later in the growing season. A majority of the plot had large girthy ears with 1/2 to 3/4 in tip back.
